

## OctaPack

The stackable, reusable container for bulk goods

OctaPack has been specially designed for safely transporting and efficiently storing heavy bulk goods such as pellets, granulates and similar materials. This reusable container for bulk goods can be stacked and is suitable for use with roller conveyors and high-bay warehouses, which makes it an especially effective and economical solution for bulk goods logistics.

## Making bulk goods stackable – more efficiency and sustainability in bulk goods logistics

Bulk goods are one of the most prevalent types of goods being transported on our roads. That makes it all the more important that they can be transported and stored economically and sustainably. The most effective way to achieve this is to make full use of the vertical space available by stacking bulk goods.

As a stackable, reusable container, OctaPack is the sustainable, efficient and cost-effective packaging solution for bulk goods. Its eight-sided pallet enclosure made from a tried-and-tested TRIPLEX structured-core panel, combined with a heavy-duty pallet and lid, make it ideal for use in bulk goods logistics. Not only can it help get bulk goods safely from A to B and store them in a space-saving arrangement, it can also carry loads of up to 1,000 kilograms and be used in high-bay warehouses and on roller conveyors. This makes it suitable for use with heavy bulk goods such as milled or ground materials, granulates and pellets.

### The benefits at a glance

- Substantial cost savings thanks to the reusable system
- Can be used repeatedly, many times over
- Exceedingly stable with outstanding load-carrying capacity and exceptionally long service life
- Damage resistant
- Load-carrying capacity of up to 1,000 kilograms
- Stackable
- Heavy-duty pallet suitable for use in high-bay warehouses and on roller conveyors
- Space-saving storage of empty containers for considerable reduction in storage space
- Secure transport thanks to QuickLock fastener
- Customised sleeve heights to help optimise loading volumes
- Suitable for transporting and storing heavy bulk goods such as milled or ground materials, granulates and pellets
- Moisture-resistant interior
- Easy handling
- Fully recyclable
- Dimensionally stable
- Compatible with liners as an excellent addition
- Wide range of configuration variants available that can often be combined with each other

## OctaPack – functional and customised

The eight-sided pallet enclosure of OctaPack is made from a TRIPLEX 10 structured-core panel with a weight of 3,000 g/m<sup>2</sup> and with a silver-grey colour similar to RAL 7001. It also includes a QuickLock fastener. This fastener gives OctaPack excellent stability, as the main part of the system is integrated into the pallet enclosure. The QuickLock fastener is also easy to use and is operated from the front. Thanks to its two-colour design and positioning, it ensures users can tell at a glance whether it is secured or open, which considerably adds to transport safety.

Due to its M fold and the fact that the lid and pallet fit together perfectly, OctaPack can be stored and transported without taking up a lot of space.

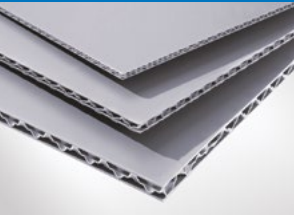

## OctaPack system components

- Eight-sided TRIPLEX pallet enclosure made of TRIPLEX 10 in a weight of 3,000 g/m<sup>2</sup> and with a silver-grey colour similar to RAL 7001
- QuickLock fastener
- Heavy-duty pallet, base outer dimensions of 1.14 m x 1.14 m, suitable for use with high-bay warehouses and roller conveyors
- Heavy-duty lid, stackable, made of recycled HDPE, black

## Configuration options for OctaPack pallet enclosures

- Customised system heights (recommended heights: 1.15 m and 2.15 m)
- Free choice of colour for enclosure, including bicolour options
- Motifs can be printed on one to eight sides, including in multiple colours
- Document pouches and label holders
- RFID or barcode labels
- UV-stable
- Anti-static
- Flame retardancy in line with fire safety classes
- Surface treatment to ensure suitability for printing and compatibility with adhesives

## Our promise

The focus of our work is on ideas to impress and serve our clients, as we strive to anticipate your needs of tomorrow, today. We think beyond the conventional approach, to test the imagination and achieve exceptional solutions. Ever open to experience and to new ideas, we aim to continually redefine standards. As a family-owned enterprise, we listen carefully and are mindful of the importance of partnership and fair dealing. Everyone contributes – with heart and mind. We see ourselves as a partner to all: employees, clients and suppliers.
