

QuickSlide 2.0

An innovative solution for secure locking

The new generation of locking technology: QuickSlide 2.0 – for enhanced safety, efficiency and sustainability when using unloading flaps. Protected by a utility model, this sliding lock is impressively durable and is made of 100% recyclable polypropylene. It keeps out liquids, and is also ideal for use in the food industry and in pallet pooling.

Innovative technology and sustainable design

QuickSlide 2.0, which is protected by a utility model, is the new generation of locking technology for all unloading flaps in TRIPLEX pallet enclosures. The reliable, user-friendly and durable locking system replaces conventional hook-and-loop fasteners – for enhanced safety, efficiency and sustainability.

Maximum safety thanks to the pairing of a strong locking mechanism and a magnet

The QuickSlide sliding lock's strong locking mechanism prevents unintentional opening or slipping of the flap. Even when the flap is open, there is no need to use hook-and-loop tapes – the new sliding lock can, on request, be equipped with a magnetic link that reliably secures the flap to the enclosure.

Sustainability combined with intelligent use of materials

The QuickSlide 2.0 is manufactured as a single part and is therefore very robust. The fact that it is made of single-origin polypropylene means that, even together with the sleeve, it is 100% recyclable and extremely eco-friendly. The cut-outs in the locking area of the TRIPLEX enclosure are completely closed, which stops liquid getting into the structured core panel. Besides making cleaning easier, this also means the pallet enclosure is ideal for use in the food industry and in pallet pooling.

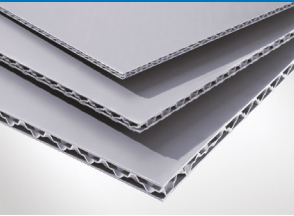

The benefits at a glance

- Universal: Compatible with all TRIPLEX unloading flaps
- Easy handling: Quick and convenient opening and closing
- Durable: Replaces hook-and-loop tapes with a hard-wearing solution – for long-term reliable handling
- A food-grade solution: Hygienic and easy to clean
- Weather-proof: Made from durable, weather-resistant polypropylene that ensures versatile use
- Optional integrated magnet: A magnetic link between the sliding lock and sleeve secures the open flap to the pallet enclosure
- One-piece design: Made from a single part to ensure enhanced stability and durability
- Flexible colour options: Comes in blue as standard, but can also be supplied in custom colours if required
- 100% recyclable: Made entirely of single-origin polypropylene and supports sustainable recycling processes
- Optimised price-performance ratio: Excellent quality at a great price

The QuickSlide 2.0 – your new solution for enhanced safety, efficiency and sustainability when using unloading flaps. Rely on state-of-the-art technology – simple, robust and green!
